

**ERRATA: INTRODUCTION TO SHIMURA VARIETIES WITH
BAD REDUCTION OF PARAHORIC TYPE**

THOMAS J. HAINES

1. In equation (12.3.1), replace $\#X_w(\delta)_{I_r}$ with the term $TO_{\delta\sigma}(\mathbb{I}_{I_r w I_r})$. That is, the correct quantity is not the number of points in the affine Deligne-Lusztig variety (which is infinite), but the number of points in the quotient of that space by the action of $G_{\delta\sigma}(\mathbb{Q}_p)$.
2. p. 633, line above (12.4.2): replace $GL_n(L_2)$ with $GSp_{2n}(L_2)$.
